

Pool Isolation Mounts – Tracking/Progress Photos

Close up of isolation mounts,
eastern end of pool structure

Placement of isolation mounts prior to cement sheet, reinforcement, etc

Concrete pour commencement to the base of the pool structure

Reinforcement to pool base, with isolation foam at western end of pool

Placement of waffle isolation pads to vertical wall joint, at western end

Placement of isolation mounts to the corbel support detail

Isolation Joint to perimeter of pool, level 02 structure

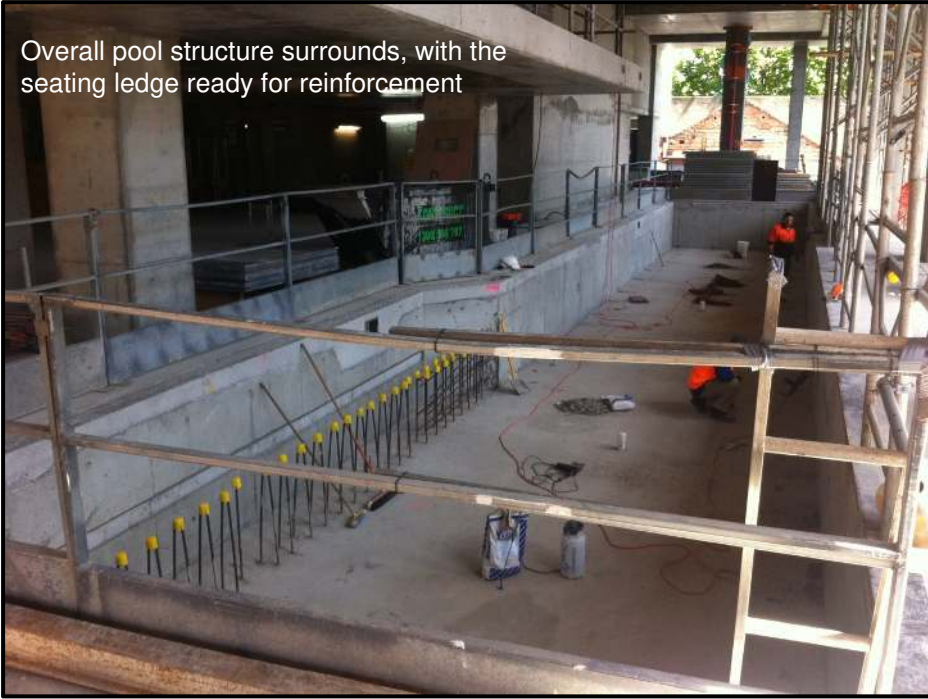

Clean visible expansion joint, that has foam and centred waffle pads

Formwork support to the pool base, located on level 01, eastern end

Overall pool structure surrounds, with the seating ledge ready for reinforcement

View of corbel support detail, which used the smaller isolation mounts than that used on upstand walls

View of the pool structure resting on the isolation mounts to the top of the upstand walls

Isolation mounts along southern upstand wall
